Location: Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Unity Game Developer with over 2 years of experience developing mobile games using Unity and C#. Experienced in gameplay systems, UI systems, multiplayer features, and client-server integration. Worked in real-world game development environments, collaborating with designers, artists, and backend developers to develop compelling game features and APIs.

WORK EXPERIENCE

Nichietsu System Development | 4/2024- Present

Game Developer

Project: Verdant Farm – Multiplayer Farming Simulation Game

Platform: Android & IOS

A social gaming platform combined with e-commerce, allowing players to both entertain themselves and make real-world purchases/shops through a parallel gaming ecosystem and e-commerce platform.

Link: [Verdantfarm - Google Play](#)

Responsibilities:

- Implemented gameplay systems and mechanics using Unity (C#) to support farming, player interaction, and marketplace features.
- Implemented UI systems, animations, and visual effects
- Built multiplayer gameplay features using socket communication
- Integrated RESTful APIs with TCP server for game data synchronization
- Optimized game performance for mobile platforms to improve stability and frame rate.
- Collaborated with designers, artists, and backend developers to deliver game features
- Debugged and fixed gameplay issues to improve stability

TECHNICAL SKILLS

- Game Development: Unity Engine, Gameplay Programming, UI System (Unity UI / Canvas), Animation & Animator, Game Logic Architecture, Client-Server Integration, Object Pooling, ScriptableObject.
- Programming: C#, C++, Object-Oriented Programming (OOP), Design Patterns, Modular Architecture.
- Networking: REST API Integration, JSON Data Handling, Socket, Firebase, Photon.
- Tools: Git, Trello, Unity Profiler.
- Platforms: Mobile (Android / iOS), PC.
